

Vitra - Planophore, Bookshelf + Roomdivider

Edward Barber & Jay Osgerby, 2014

details

Edward Barber and Jay Osgerby have designed Planophore 2014 for Vitra as a dual-purpose room divider and bookshelf. Its open sides create a horizontal emphasis underscored by the solid shelves with rounded bottom edges, which are reminiscent of aircraft wings and appear to float on the vertical panels. This also explains the name of the shelf: the original Planophore made its debut in 1871 as the first stable model aeroplane powered by twisted rubber bands. The vertical aluminium panels are Planophore's most striking structural feature: they can be rotated to serve as functional shelf dividers...
